A Woman with a Living Snake or Lizard in Her Stomach. From the Anamora Iowa Enreka.

The wife of Mr. Parker, who recently purchased an interest in the Anamosa Stone Quarry, has been made cognizant of the terrible truth that she has within her stomach a living snake or lizard. For the past five years she has suffered almost the past five years she has suffered almost the control of the past five years she has suffered almost the control of the past five years and the control of the past five years are the control of the past five years are the control of the control everything possible for a human heing. and was supposed to be gradually dying from consumption. Some two weeks since a German physician from Lisbon, Linn ounty, being in town, was requested to make an examination into her case to see I any remedy could be devised to relieve if any remedy could be devised to relieve her intense sufferings. The physician visited her, and became at once satisfied that there was a living animal within her stomach. On Thursday last the starvation ocess was begun, and continued for five ing this time the animal repeatedly ducing terrible and almost fatal straugu-lation, and making it necessary to admin-ister salt to drive it downward. At such times the lower part of the throat would pressed outward in a most perceptible ad revolting manner. On Monday last he attempt was made to dislodge the leathsome creature by placing a pan of heated milk near the patient's mouth, and permitting her to inhale the steam. A ltice of onions and garlie was applied to the stomach, but, through misunder standing, the onions were cooked. and their strength thereby mostly destroyed The experiment, however, was tried, but the animal moved up only a short distance, a green slime heing emitted from the mouth. The patient is greatly prostrated eve her, although it seems almost eertain that the animal, whatever it is, hus grown so large as to make its egress through the throat impossible. We understand that the patient believes her torentor to be a suake!
The case is attracting great interest, and any new developments will be care fully noted for the benefit of our readers.

The Missouri Legislature, before adjourning, passed such an act, and the Governor has signed it. The special provisions are not given. Illinois had previously done the same, but in the Illinois law there are provisions which allow any parties to arrange for working a longer time each day by contract or agreement, and also declure that the law itself shall not apply to farm labor. Mr. McClare's ranch, beyond Canon City:
A party, led by Bell Vinton, started immediately in pursuit. They tracked the thieves two hundred miles, far into New Mexico, und overtook them. A fight ensued, and the thieves (two Mexicans) were killed. One of the pursuing party and a herre shot under him and another gave themselves up to the nearest Al-calde, were examined, and their act is killing the thieves instified. They were released, and returned home.

The size of farms is growing small in California. Formerly the average was 4,066 acres; now it is 300 acres.

It has long been the custom in Mexico to shoot commissioned officers captured in battle, but this is the first instance in many years where any considerable number of private soldiers prisoners have been sentenced to death and executed. During all the wars, the Mexican leaders have regarded the private soldier as an irresponsible instrument in the hands of the conscripting commissioned officers. Then why, let us as have they at this time

sible instrument in the hands of the conscripting commissioned officers. Then why let us ask have they at this time dragged 123 soldiers to the executioner's block? There is but one answer to be given. These soldiers were foreigners. They were only Frenchmen, and when disarmedwere heroically put to death. The perpetrators of this atrocity were perficious, treacherons assassins.
